

Ryedale Woodturners

News Bulletin 42 – 23 October 2022

Hello all

Training / hands on days/sale

12 members and a young Bernese mountain dog gathered for an enjoyable hands on day at John Lund's workshops in Broughton on Wednesday. I think we had 5 lathes going. Many thanks to John for his hospitality, and to Geoff for organising the day.

The next hands on day is at Andy McLaughlin's workshop in Ebberston, on **Wednesday 9 November**. Contact [Geoff](#) to book a place.

For sale

Record DML24 lathe

A former club member, Roger Dudley, has a Record DML 24 lathe for sale. Although it is an older model, it has been little used and is in good condition. He has a set of 8 Marples turning chisels which he is putting in with the lathe. He suggests £100 for the lot. This DML is a bench mounted lathe. It is 3-speed, using a 3-pulley system. It does not have a swivel head. The 24 refers to 24" between centres.

If you are interested, Roger lives in Rillington, and you can contact him on 01944758113 or 07977414863.

Kiln dryer EBAC

An unusual item for sale, not for anyone short of space. John Lund has an Ebac kiln dryer surplus to requirements. It is a wooden construction with a controlled heater inside, about 14 foot long by 6 foot wide, and will dry timber from green for turning or burning. If you or anyone you know might be interested, contact me in the first instance and I will pass on John's details.

Community Showcase

If you have bought anything from Turners Retreat, you may be interested in their monthly showcase offer. If you send them 3 photos of an item you have made using anything from them (tools or materials), and your item is considered the best in their monthly competition, they will showcase your work (photo) and give you a £25 voucher. The entries for a Christmas design close on 31 October. More information on their website at <https://www.turners-retreat.co.uk>

Snainton Woodworking Supplies

There are some good looking British Wood packs on offer at Snainton. £25 for 7 bowl blanks in a “starter pack” seems like a reasonable price for those wanting to make a few bowls. There are other bundled packs available as well. I may buy one to use as raffle prizes.

The supplies of wood I have been bringing to club nights have just about gone, so it is time to look elsewhere, until another garage clearance or donation comes along.

Gallery

John Kershaw has been busy turning a railway sleeper into a bowl

“This week I turned a bowl from a piece of Jarrah, an old railway sleeper, which has been under my bench for a number of years I have include a before and after photograph. The finished bowl is 5 ½ ins diameter and 4ins high it was tough going but the rich colour made it all worthwhile.”
